

In Leasba we believe that quality and customer service are the basis for every project.

On the one hand, we offer legal consulting services.

On the other hand, we provide you with the technological component that every business needs, whether it is equipment, development or IT security.

Whatever your requirements, we will try to be by your side providing an comprehensive service to meet all your needs.

We do not only want to be your suppliers, we want to be your partners.

Just allow us to show what we can do for you.

Lucio Fuertes Soto

CEO

ABOUT US

In Leasba we believe that quality and customer service are the the basis of every project. This is why we have been working to improve our services day by day for more than 10 years, always at the forefront of innovation.

In our beginnings, we started offering working, accounting, fiscal and legal services. In the latest years we have expanded and renewed our portfolio to meet the current needs of a business: legal advice in e-commerce, apps, etc.

We count on a whole legal team, experts in comprehensive business consultancy and on new technologies professionals, who work in concert.

Our team is formed by professionals who are motivated to deal with important challenges, with a great capacity for learning and involving in each of the activities they undertake.

QUALITY

With the commitment to increase the trust of our clients and employees to the degree to which we are able to satisfy their needs, we have achieved a prior goal of the Directorate: to complete our quality certifications.

UNE-EN-ISO 9001:2008: Management system for the working processes in sale, installation, maintenance and after-sales service of computer systems. Legal, fiscal, labor and accounting advice.

UNE-EN-ISO 14001:2004: In environmental matters for the sale, installation, maintenance and after-sale services of computer systems. Legal, fiscal, labor and accounting advice.

UNE-ISO/IEC 27001:2007: Management and security system of the information that support the processes of sale, installation, maintenance and after-sales services of computer systems; software development; Legal, fiscal, labor and accounting advice according to the document of applicability.

Legal Consultancy

The most complete counselling and management for your business.

- A team of professionals ready to keep growing with you.
 - Comprehensive advice in labor, fiscal and accounting matters.
 - Direct and personalized customer service.

All the help you need to comply with statutory requirements in the field of LOPD, LSSI, cookies, legal notices, etc.

Comprehensive Consultancy for Businesses

If you need advice and/or management in any area of business management, our team will support you and will work to offer you the best possible solution.

We offer you the most complete service that ranges from labor, accounting, fiscal and commercial advice and management to counselling within the legal system. All of our professionals work together to offer you a comprehensive service.

Legal Consultancy In New Technologies

We provide you with a New Technologies Expert Department specialized in Legal Consultancy regarding Information Technologies and Electronic Commerce, always offering an appropriate solution for your needs.

We conduct complete advice in matters related to the creation of websites, domains, design, technology and communication. Our department is formed by professionals who will guide you in the processes of implementation and launching of new technologies and e-commerce in your business.

Technology Law

We have technical-legal specialists in solving conflicts derived from the areas that include the Internet Law, applying the Law of Information Society Services and Electronic Commerce, the Organic Law of Personal Data Protection and the General Law for the Protection of Consumers and Users.

- Privacy policy drafting.
- General legal advice in terms of Data Protection and privacy.
- Reviewing and drafting of legal texts in websites.
- Online taxation.
- Security of the information of on-line payment systems.
- Legal advice in the area of on-line fraud, identity theft, etc.

Technological Consultancy

Computer and Audiovisual Equipment

- Equipment with the highest degree of quality that ensure innovative and high-tech products.
- Specialists in the Education Field with products, services and professionals specialized in offering the best solution.
- Hardware, Networking, Audiovisual Services, Interactive Services and Digital Portfolio.

Hardware and Software maintenance. IT security.

- Technical support maintenance of the business hardware and software.
- Preventive maintenance service to avoid incidents.
- Direct and personalized customer service throughout the whole service.
- Application analysis, source code, internal network and WiFi network audit.

Computer and Audiovisual Equipment

We consider that providing our clients with everything they might need is the key to their success and ours. This is the reason why we offer a wide range of personalized solutions to all our clients.

From Computer and Audiovisual Equipment to Interactive Solutions, Professional Videoconference, Communications, Cloud Computing and Networking Solutions.

We are distributors of Hardware and Software, Consumables and Peripherals, as well as other Image and Audiovisual Communication products. Computer Maintenance Services, Networks Installation and After-sale Service complete our portfolio in our Technical-Commercial Department.

Our main goal is to offer our customers the best combination of availability, price, and added value services, counting on a whole Department of Service and Support, in both pre-sale and in after-sale needs.

Maintenance of software, hardware and IT security

Our maintenance team is ready to respond quickly to any incidents, in the operating systems as well as in enterprise hardware. We offer a telephone, remote and on-site helpdesk when required.

We also provide you with a preventive maintenance service to analyze the condition of your IT equipments and to be able to prevent any incidents before they occur.

The objective that we intend to achieve is to ensure that the resources of the information systems of an organization are used in a responsible way and that the access to the information that they contain, as well as its alteration, are only possible if done by those authorized individuals and within their boundaries of authorization.

Our commitment is completed with our ISO 27001:2013 certification in Information Security in all our working processes. To do this, our company is a member of the Innovative Business Group in Cyber-security and Advanced Technologies.

Sale, installation and configuration of management software

- For the management of your business to be easier and easier.

Sale, installation and maintenance of management software

Our main aim is to offer our customers the best combination of availability, price and services. To do this, we have a whole service and support department in both pre-sale and post-sale scopes.

We guarantee a high operational capacity service level.

Our wide range of products and services include all the necessary programs for the optimal performance of the business activity.

We are distributors, we install, we do the maintenance and the configuration. Furthermore, we offer an after-sale technical and commercial service.

Development of multi-platform applications

We develop fully customized applications for the web environment and we undertake their maintenance and updating services.

The fact that we have taken part in TIC projects for many years and that we have a qualified professionals team guarantee the delivery of a well-focused and resolute project.

Our objective is, as usual, to satisfy the needs of our clients and, to do so, we start every project by doing a preliminary study and an evaluation of the pros and cons that you could encounter in its evolution.

We offer Cloud Computing services for all kinds of business. We want to give you all the ease for you to be able to devote as much time as possible to your business without having to worry about IT matters.

Multi-platform applications development

- We develop enterprise web applications of services and e-commerce
